

BETAR - Relaxation through Resonance

BETAR is the ultimate sound relaxation system. Users recline on a comfortable table while their favorite music washes through them, takes them for a vibroacoustic audio ride that is as exciting, as tranquil, or as joyous as the music they selected. Specially tuned transducers mounted down the length of the table ripple music directly through the user without excessive volume. Top quality headphones place the rider of a Standard Edition BETAR system in the center of a personal sanctuary of healing. Riders of Pro Edition and Master Edition BETAR systems float in space in a geodesic framework that is positioned at the focal point of a powerful speaker array that guarantees complete immersion within their songs, symphonies and soundscapes.
